

Join the #tanklab at the University of Notre Dame!

We are recruiting a PhD student to join our lab starting Fall 2022. The selected student will have the ability to develop their dissertation trajectory with a focus on the following:

- Stream and river biogeochemistry
- Land use impacts on surface and groundwater
- Impacts of agricultural conservation on water quality
- Controls on eDNA & antimicrobial resistance genes (ARGs) in flowing waters

Work in the Tank Lab will provide extensive training in water chemistry analysis, foundational stream ecology methodology, outreach & education, and science communication. Opportunities will also be provided to attend national conferences to present data and workshops to enhance specific skillsets.

Interested? Find more information on the Tank Lab at our website: tanklab.weebly.com/. Send an introductory email to Dr. Jennifer Tank (tank.1@nd.edu) for more information on potential projects, & the application process. Please include a CV & unofficial transcripts.

Application is due December 1, 2021. Apply here: <https://gradconnect.nd.edu/apply/>
